

Since 1987 the Young Naturalist Company has been designing and distributing their own products under the title Nature Education Kits®. All of our Nature Education Kits® consist of lesson plans, activities and natural plant material that have been dried and packaged for student use.

The real leaf, seed, twig, and crop specimens make ideal learning tools for teaching about the diversity of the natural world through such concepts as classifying, analyzing, and using dichotomous keys. Real specimens are much easier to use as a teaching tool than a picture or an electronic image.

# Nature Education Kits®

## PRODUCT LIST

### #201 Leaf Identification Kit

Students key out, identify and classify real leaves by their shape, size, veins, margins and position on twig from 39 real tree leaves.

### #203 Seed Identification Kit

Students key out, identify and classify real tree seeds by their size, shape, color, type and means of transport from 39 real tree seeds.

### #205 Crop Identification Kit

Students enjoy a hands-on study of 10 important crops and their by-products.

### #207 Leaf and Seed Games

Students are introduced to the essential science skills of inquiring, observing, predicting, classifying, measuring, comparing, collecting and analyzing data. Contains 20 leaf carded specimens, 20 seed carded specimens and instructions for 8 games.

### #209 Twig Identification Kit

Students key out and identify winter twigs by their color, size, shape, buds and thorns on 39 real twig specimens. They will determine the age of the twigs and chart bud development.

### #211 How A Tree Grows Kit

Students will use actual tree parts to learn about chlorophyll, photosynthesis, water absorption, transpiration and the distribution network for food, minerals and water.

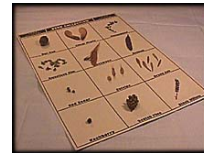

### #213 Leaf Collection

A collection of 12 real tree leaves mounted on a 12"x16" poster board enclosed in a clear, sturdy, vinyl envelope.

### #215 Seed Collection

A collection of 12 real tree seeds mounted on a 12"x16" poster board enclosed in a clear, sturdy, vinyl envelope.

### #217 Crop Collection

A collection of 9 real North American crops mounted on a 12" x 16" poster board enclosed in a clear, sturdy, vinyl envelope.

### #219 Dichotomous Leaf Key

An actual leaf key set up as a dichotomous key display using real leaves and twigs. Leaf and twig specimens are mounted on a 12" x 16" poster board enclosed in a clear, sturdy vinyl envelope.

### #301 Tree Identification Kit

Learn a new hobby - Tree Identification. It's fun, easy and educational. Learn how to key out 13 different leaves in the kit. Then use the Tree Finder book to key out your own local trees.

### #303 Winter Tree Identification Kit

A tree's most noticeable winter identification feature is its winter bud and the scar below it. These features can be readily seen in the 13 different twigs that are part of this kit. You will learn how to use a twig key and how to easily identify trees in the Winter Tree Finder book.
